

12. Write a Java Program which open an existing file and append text to that file.

Algorithm:

Aim: Appending text to the existing file

Step No.	Instructions
1	Start
2	Create a file named "new.txt" using edit command in DoS
3	Open a random access file named "new.txt" in the Read Write mode using the function RandomAccessFile( ).
4	Move to the starting location in the file using seek( ) function
5	Read the contents from Keyboard using BufferedReader( )/ DataInputStream ( ) and readLine( ) functions
6	Append the contents into the file using writeBytes( ) fuction
7	Close the file. Now the file is updated successfully
8	Save the program in the name of list12.java
9	Compile the program using javac
10	Run the program using java
11	Enter the text and check whether text is appended or not using type command
12	Stop
